Our long-standing commitment to the environment encompasses everything from recycling, energy and resource conservation to waste reduction, low-VOC finishes and sustainable products. The ESP program through the Kitchen Cabinet Manufacturers Association (KCMA) certifies that those efforts positively impacts both the environment and our community.

## **Certification in the ESP is awarded annually.**

Manufacturers must earn a minimum of 80 of 110 total points based on compliance in five categories:

- » **Air Quality (30 points)**  
use of panel products proven to reduce the emission of hazardous air pollutants (HAPs)
- » **Product Resource Management (30 points)**  
use of recycled and sustainable products
- » **Process Resource Management (20 points)**  
company has a recycling, waste stream management, and energy conservation program in place
- » **Environmental Stewardship (20 points)**  
manufacturer has a documented program which demonstrates its commitment to environmental quality and reviews the environmental practices of its key vendors
- » **Community Relations (10 points)**  
company demonstrates community involvement and leadership through service or charitable organizations

In addition to points, supporting documentation must be provided to substantiate that the company has instituted the necessary policies and procedures.

Upon certification, all ESP-certified companies are awarded the ESP seal to display on their products, giving testament to their dedication to preserving much needed resources.
