Metal accents are a great way to add a touch of modern style to your design. Mix a couple of doors and drawer fronts with HG Foil, Greenlam or TSS designs for an industrial edge, or put vertical lift doors with aluminum frames on either side of the cooktop for an interesting focal point.

Stainless steel floating shelves are another way to bring some flair to your kitchen or home office. Whether floating on the wall or used as a bridge between cabinets, as shown above, the subtle shine elevates your storage options.

Finally, aluminum base structures come in a variety of configurations for islands, tables and even benches. Top a low structure with cabinets for a storage-packed island, add a thick butcher block top to a tall structure for a handy prep space, or add a granite top to a medium size for a low table. Don't forget the office, media room, or...? Get creative!

Metal framed doors and drawers, stainless steel floating shelves and aluminum base structures are offered in our Millennia custom frameless line.
