

Comparing Millennia, Cornerstone & Katana

Get a quick snapshot of key features in our premium custom frameless (MIL) and framed (COR) lines, plus value frameless (KTN):

Millennia is a premium line with expanded finishes, materials, modifications and custom options to fit demanding requirements.

Cornerstone is our traditional line and provides multiple overlay options, including Inset and Beaded Inset, for the look of fine furniture.

Katana's streamlined offering was created to provide designers a budget-friendly option when price is the main factor in a project.

See next page for more detailed specifications >>
