Product Specifications

- Fully custom line
- Inset & Beaded Inset available
- 110 door styles
- 12 wood species + thermofoil
- Green options
- Unlimited stain & paint colors
- 15 finish enhancements

Cornerstone

Canyon Creek Cabinet Company

Rev: 4/2017
**Framed Cabinet Construction**

1. **Cabinet Box**
   - Choice of 1/2” thick particleboard or plywood box construction.
   - Dadoed sides lock in the top, bottom and back panels.
   - Lower cabinets have full-width solid wood stretchers across the back and solid wood corner blocks in front for increased stability.

2. **Exterior**
   - Standard exterior is unfinished with multiple finished end options.

3. **Interior Finish**
   - **Plywood**
     - White Vinyl
     - Natural Wood Veneer
   - **Particleboard**
     - White Vinyl
     - Wood-Grain Vinyl
   - **Modifications**
     - Finished to Match (FMI)
     - FMI with Beaded Back
     - Beaded Interior Back

4. **Adjustable Shelves**
   - 3/4” thick for increased durability.
   - Base and Vanity adjustable shelves are full depth, for more storage than many brands.
   - Shelves adjust in 1 1/4” increments.
   - Installed adjustable shelves feature clear plastic locking shelf clips.
   - Brass clips are available for loose shelves that are finished to match the door.
   - Optional Roll-Out trays may be added.

5. **Face Frame**
   - Solid hardwood joined with screw dowels and glue for stability.
   - Full-width frame rails provide extra strength and durability.
   - Opening size and accessibility are increased by eliminating fixed center Mullions on cabinets 36” and less in width.

6. **Drawers and Roll-Outs**
   - Choice of 1/2” plywood dovetail or 5/8” hardwood dovetail construction.
   - Roll-outs are 5/8” hardwood dovetail.
   - All drawers and roll-outs have a 1 1/4” thick bottom panel that is dadoed front and sides for durability.
   - Drawers and roll-outs are maximum depth (not the shorter Vanity depth used by many competitors).

7. **Drawer/Roll-Out Guides**
   - Load capacity up to 75 lbs. (including weight of drawer)
   - **UMFEG-IM**: Undermount full-extension with inMotion “self-closing” system and 6-way adjustment.
   - **FEGZ**: Zinc-plated w/ball-bearing, Side Mount Full-Extension.
   - **FGW** or **FEBG**: White or Black epoxy-coated w/ball-bearing, Side Mount Full-Extension.

8. **Hinges**
   - Doors over 36” in height will have three hinges per door
   - Doors over 60” in height will have four hinges per door

   - **Modified Overlay**
     - Concealed, 6-way adjustable one-piece, self-closing
     - Concealed with inMotion, soft close

   - **Traditional Overlay**
     - Exposed, semi-concealed, one-piece, self-closing
     - Concealed, 6-way adjustable one-piece, self-closing
     - Concealed with inMotion, soft close

   - **Inset Overlay**
     - Concealed, 110° opening, self-closing
     - Concealed with inMotion, soft close
     - Finish Ball, exposed 170° opening, finished in optional Black (BK), Polished Brass (PB), Pewter (PW) or Sterling Nickel (SN)

Most door styles have multiple options for edge details. Mitered, Laminate, and Thermofoil door styles have “Standard” edge details that are unique to each style.

Edge details ending in “F” indicate a routed finger pull on top and bottom of door and drawer fronts. Edge details ending in “F” do not require knobs or pulls. Unless noted, all other edge details require a knob or pull.
General Wood Species Characteristics

Wood components used in cabinetry are a product of nature and include a variety of species with various densities, colors and grain patterns. Color variation within a wood species is influenced by a number of factors such as moisture and mineral content of the soil, exposure to sunlight and genetic makeup. The tree diameter and type of cut determines growth ring size and orientation, which in turn affects the grain pattern and color.

A range of grain patterns and colors may appear on the same panel, and adjacent door and drawer fronts may not match each other. These are natural characteristics of wood and are not considered a defect.

<table>
<thead>
<tr>
<th>Rustic Woods - Rustic Alder, Rustic Beech, Rustic Hickory, Rustic Maple</th>
</tr>
</thead>
<tbody>
<tr>
<td>No single door or front perfectly matches another. The look is created by a blend of cabinets, each with its unique characteristics. Creating this overall appearance on a single sample is not possible, so we recommend viewing as large a sampling as possible.</td>
</tr>
</tbody>
</table>

- Characteristics represented: mineral streaks, burl grains, natural color variations, grain variations, naturally occurring cracks, grain roughness and knots.
- Open knots (up to 1/2") are acceptable, but they must be structurally sound, and may not have sharp edges that can create a hazard for end user.
- Presence of Rustic characteristics cannot be guaranteed on each piece, or as part of every cabinet. Rustic product contains natural attributes of the wood species, so quantity, size, placement, and color of characteristics will vary.

- Individual characteristics may not be specified on an order, and their consistency (or lack of) is not considered cause for replacement. Doors, drawer fronts, Finished Furniture Ends, Finished Furniture Backs and Panel Ends are only components that will be Rustic.
- All veneer panels and mouldings will be manufactured using clear material. Cabinet accessories and components of 3/4" sheet-stock will be produced using clear material. (Examples: letter organizers, end shelf cabinets, range hoods, valances, and finished interiors.)

Maple

A stiff, strong, heavy wood. **Grain patterns:** tight and uniform with a smooth surface. **Characteristics:** burl grain, pin knots, hardwood stains, mineral streaks, tiger stripes, caramelizeing. **Color:** nearly white to yellow, pink, light purple and slightly reddish brown. **Note:** Natural resins cause Maple to turn yellow or amber over time. Exposure to sun or natural light speeds up this process. (More obvious with light-colored stains or clear finishes.)

- Characteristics represented: mineral streaks, burl grains, natural color variations, grain roughness and knots.
- Presence of Rustic characteristics cannot be guaranteed on each piece, or as part of every cabinet. Rustic product contains natural attributes of the wood species, so quantity, size, placement, and color of characteristics will vary.

Cherry

Moderate in hardness, weight and strength. **Grain patterns:** fine to medium, with a relatively smooth surface. **Characteristics:** small flecks, mineral streaks. **Color:** light tan to light brown. Darker stains tend to subdue flecks, though grain patterns may be more apparent. **Note:** Exposure to sun or natural light causes Cherry to darken. Color changes over time can be dramatic, and will be enhanced with light or clear finishes.

Alder

Moderately light, somewhat soft hardwood grown primarily in the Northwest. **Grain patterns:** minimal, with a smooth surface. **Characteristics:** pin knots, grain “fuzz”, mineral streaks. **Color:** very white to tan and pale pinkish brown. Clear, light stain colors accentuate differences.

Beech

Strong hardwood with excellent durability. **Grain patterns:** “closed”. **Characteristics:** small flecks, mineral streaks. **Color:** light tan to light brown. Darker stains tend to subdue flecks, though grain patterns may be more apparent. **Note:** Pre-drilling recommended before hand-nailing or inserting screws.

Hickory

Very heavy, hard and dense. **Grain patterns:** bold, prominent and irregular. **Color:** extreme variations (often in a single board) from nearly white to dark brown. **Characteristics:** burls, water stains, mineral streaks, sound knots. **Note:** Pre-drilling recommended before hand-nailing or inserting screws.

Red Oak

Dense, heavy wood, very hard and stiff. **Grain patterns:** open and prominent. **Characteristics:** mineral streaks, mineral stains, sap stain, ray flecks, pin or closed (sound) knots. **Color:** light tan to grey, dark brown, and pink to medium red-brown.

Saale

An African hardwood prized for its strength. **Grain patterns:** interlocking, fine textured, luminous grain that frequently changes direction. **Characteristics:** When quarter-sawn, produces a “ribbon” striped pattern. **Color:** ranges from light brown to medium brown tones.

Black Walnut

A durable hardwood with a rich, smooth grain. **Grain patterns:** range from straight to irregular, with a natural luster. **Color:** overall a dark wood. Natural color variations vary from deep, dark chocolate brown to lighter browns. Sapwood may be light blond to nearly white.

All woods change color over time. The amount of change varies depending on wood species, type of cut, exposure to natural light, and amount and color of stain pigment used. While color samples give a general idea of the appearance of a specific stain color and wood species combination, it is impossible to represent all grain patterns, wood and stain colors, and natural variations that will occur. Because of this, we recommend viewing the largest sample possible before final species and color selection.

All paints are available in Standard, Matte and Lo-Luster Gloss. Pick Your Paint Program. We can easily match over 8,000 colors in our lab from a manufacturer’s paint chip.

Stain color and species combinations noted with a “-“ are not recommended. Request approval using the SPR process. Unfinished products are sanded prior to shipping but may require additional preparation due to changes in moisture content of the wood.

12/2016

Cornerstone Framed Cabinet Specifications
Finish Enhancements

Many factors determine the final appearance of products with finish enhancements, such as door style, edge detail, wood species, and stain/finish enhancement selections. Enhancements are applied by hand, so the amount, density and strength of each enhancement will vary from one piece to the next. The wide range of product options combine with the technique of the individual applying the finish enhancement to create a look that is truly unique.

Samples are only a representation of the general characteristics that occur when a specific door style, wood species and finish enhancement(s) are chosen, and actual product may vary from the sample viewed.

We strongly recommend that a sample door be viewed prior to placing an order.

Distressing

Random nicks and cuts are hand-placed on the surface to create a well-used, or aged look. Amount, placement and severity of Distress marks are random and may be inconsistent from one piece to the next.

Distressing is applied to all finished wood surfaces, except the back of doors and drawer fronts. Glazing will “hang up” in Distress marks. Highlighting is not applied to flat surfaces where Distress marks are prevalent.

Artisan Packages

Six unique combinations of hand-applied Distressing techniques simulate old world craftsmanship and vintage aging.

Available on wood door styles with solid wood raised or solid wood recessed panels. Applied to: doors, fronts, Finished End doors, Finished Furniture Ends and Backs, and Appliance Door Panels.

We recommend that Glazing, Patina or Antiquing be ordered with Artisan (price not included) with the exception of Créme Brulé.

We suggest adding standard Distressing to Inset and Beaded Inset orders, and orders with numerous open cabinets to blend Artisan and non-Artisan components. Combining Distressing techniques from different packages is not allowed.

ARTISAN PACKAGE 1
- Chisel Marks
- Dings
- Screw Marks

ARTISAN PACKAGE 2
- Worm Holes
- Worn Edges
- Cracks

ARTISAN PACKAGE 3
- Carved Edges
- Chisel Marks
- Dings

ARTISAN PACKAGE 4
- Re-Sawn
- Worn Edges

ARTISAN PACKAGE 5
- Scarring
- Worm Hole
- Chisel Marks
- Worn Edges
- Cracks
- Screw Marks
- Worm Hole Clusters

Note: Artisan 4 and 5 require a six week lead time.

Artisan 3 and 5 not available with inset doors

Cornerstone Framed Cabinet Specifications
### Antiqued – Chocolate
- Muted brown brush strokes applied in direction of wood grain result in a look common with painted antiques.
- May include slightly curved brush strokes, “cross-hatching” where wood grain changes direction, buildup and swirls at end of the brush stroke, and general inconsistencies in level of Antiqued material.
- Antiqued is available on Paint colors only and spattering may be added.

### Glaze
#### Chocolate, Licorice, Pewter, Suede or Vanilla
- Glaze material is flooded over surface, hand-wiped to create an aged or antiqued look unique to each piece, then sealed with a topcoat. Glaze “hang up” will be heavier on styles with sharp crevices in panel or edge details, and in Distress marks. (If ordered.)
- Woods with open grain, such as Red Oak and Hickory, will retain more Glaze material, which accentuates the grain pattern.
- Glaze may not be visible on flat surfaces.

### Highlighting
#### Chocolate, Licorice, Pewter, Suede or Vanilla
- Highlighting material is airbrushed directly into detailed areas of doors, fronts, mouldings and Beaded Inset face frames.
- Highlighting does not change base stain color dramatically, as it is not applied to flat surfaces.

### Patina
#### Licorice
- Glaze material is applied to the surface using a brush to create a heavy antiqued appearance. Patina does not have the “hang-up” appearance like standard glaze; it remains on smooth surface.
- Woods with open grain, such as Red Oak and Hickory, retain more Patina, which accentuates the grain pattern.
- Brush strokes are visible and follow direction of wood grain and the addition of Patina will alter the base color to varying degrees.

### Sand-Through to Wood
- Sand-Through to Wood depicts long-term wear through finish to natural wood due to repetitive handling.
- On doors and drawer fronts, the location and intensity of sanding is randomly placed on outside corners, corners of raised panels, beads on beaded panels, inside and outside edges of stiles and rails and edges of raised panels.

### Spattering
- Small specs of black stain are randomly sprayed on finished areas to create unique, antiqued look. Size, quantity and density of spatter marks will vary from one-piece to the next, and between each order.

### Burnished
- Wood is lightly sanded in random areas after stain is applied, revealing a portion of natural wood color.
- Available only with Ebony, Indigo, Brick and Verdi stain colors.

### Sand-Through to Color
- Sand-Through to Color (STTC) gives the appearance of the top coat of paint having worn through, exposing a different color below.
- STTC is available with all paint colors; selected stain colors are used for the “exposed colors.”
