Quality at a great price...

Katana frameless cabinetry from Canyon Creek is all about simplicity, with a streamlined selection of door styles, woods and finishes. We also made sure the line fits today’s love of clean, modern design, with wood-look doors and High Gloss Laminate options.

Front cover: Trinity in Moselle TSS

TSS | 4-7
High Gloss Laminate | 8-9
Painted Doors & Colors | 10-11
Stained Wood Doors | 12-18
Construction & Thermofoil | 19
Canyon Creek offers three TSS collections—Solar, Lunar and Eclipse—for maximum flexibility. You can showcase a single texture; pair one with paint, or accent your HG laminate design. The choice is yours!

Thermo Structured Surface (TSS) is a unique alternative to wood, featuring a textured wood grain face that has been thermally fused and heat stamped to a particleboard core. This creates a durable, easy-to-clean surface that works well in any room of the home.

Canyon Creek offers three TSS collections—Solar, Lunar and Eclipse—for maximum flexibility. You can showcase a single texture; pair one with paint, or accent your HG laminate design. The choice is yours!

Visit the Collections/Katana section at www.CanyonCreek.com to see all things Katana.

Check out the “TSS Visualizer” to see each color on Trinity, as well as styles from our Millennia line.
Bring on the shine with high gloss laminates. Pacifica features a matching edge for a consistent look, while Paragon offers a contrasting edge in 1mm PVC aluminum-look edging. Both are available in the colors at right.

High gloss means highly reflective - we put a bottle on the countertop in front of a black Pacifica door to show the effect.

Made with a rigid vinyl foil that is bonded to an MDF core, Thermofoils are durable and resistant to scratches, dents and stains. Neo, Trenton and Jericho are available in White.
Painted cabinets have some unique characteristics that are important to know about. As wood naturally expands and contracts with changes in temperature and humidity, hairline cracks can occur wherever there’s a joint between pieces of wood with grain running in different directions. For example, the joints between stiles (vertical pieces) and rails (horizontal pieces) on doors or face frames. Since paint sits on the surface of the wood instead of sinking in like stain will, it is more susceptible to water damage. Be sure to wipe spills and splatters promptly with a clean, dry towel.

Our selection of painted doors offers something for everyone, from clean, Shaker-inspired doors to styles with more detail and dimension.

These Maple and MDF doors are available in the paint colors shown at left – with or without glazing (PG 7).

Glaze colors:
- CG = Chocolate
- LG = Licorice
- PG = Pewter
- SG = Suede

Warm up your home with the natural characteristics of wood cabinetry. Our selection of wood doors has been chosen to reflect the styles that are popular with homeowners today.

From Shaker-inspired looks to doors with interesting details and unique edges, you’re sure to find a style that appeals to you. We’ve included our most-requested species and stains, and let you choose the combination that works best for your home and style.

Wood doors are available in the stain colors shown on the following pages—with or without Glaze.

Glaze colors: CG = Chocolate | LG = Licorice | PG = Pewter | SG = Suede

Katana offers quality frameless cabinetry—in a wide variety of door styles, colors and species—at a great price. Manufactured in Monroe, WA, Katana cabinetry is available for delivery in as little as four weeks.
Wood cabinets are constructed from many pieces of material and may exhibit many, or few, of the variations found in a given species. As a natural product, there is potential for noticeable differences in grain patterns or colors to appear on a single drawer front, or throughout a cabinet.

For a more uniform look, opt for a darker stain, or select an engineered material such as TSS or HG Laminate.

Katana frameless cabinetry offers quality cabinetry at a great price. Like all of our cabinets, Katana features a durable, low-VOC finish that will stand up to just about any household food product or chemical without damage, and we back the line with a comprehensive warranty.

- Drawer boxes and roll-outs are 1/2” solid wood dovetail construction with a natural wood finish and a fully captured bottom panel.

- Undermount, full-extension drawer guides feature a soft close system.

- One-piece concealed hinges include a soft close function.

- Full-depth white melamine adjustable shelves are 3/4” thick particleboard.

- The cabinet box is 5/8” thick particle-board on top, bottom, sides, toekicks and spreaders with a 1/2” captured back. Boxes are doweled and glued for stability. (Plywood upgrade is available.)

- Integral finished ends (IFE) may be ordered for each cabinet (the standard exterior is unfinished).

- Interior finish is white melamine on particleboard or woodgrain laminate on plywood. Many cabinet interiors can be finished (FMI) to match the door species/color.

Mixing Materials
White and grey paints are mainstays of kitchen design, and are a great choice when remodeling with resale in mind.

When personalization is the goal, consider mixing painted cabinets with wood stains, TSS, or High Gloss (HG) Laminate.

As you can see here, warm stains like Cayenne complement most paint colors. For added contrast, pair darker stains or the Eclipse Collection TSS styles with White or Icing paint.
This brochure is intended to show the wide range of finishes and materials available - we don’t recommend making a final decision from this book or our website. Neither can truly show the variations in color and texture that are present in all of our products. We suggest ordering a door sample in the material, wood, and finish you’re considering - it will also make shopping for tile, countertops, flooring and more much easier!
