

## Demonstrating Our Environmental Commitment

We've been focused on sustainable manufacturing for more than 30 years, and constantly look for better materials, ways to cut energy use, and create less waste. We work closely with vendors and local, state and federal agencies to continually evaluate our products, processes and systems for improvement.

## Environmental Stewardship Program

Our long-standing commitment to the environment encompasses everything from recycling, energy and resource conservation to waste reduction, low-VOC finishes and sustainable products. The Environmental Stewardship Program (ESP) through the Kitchen Cabinet Manufacturers Association (KCMA) certifies that those efforts positively impact both the environment and our community.

Certification in the ESP is awarded annually based on demonstrating that manufacturers comply in the following five categories:

- Air Quality
- Product Resource Management
- Process Resource Management
- Environmental Stewardship
- Community Relations

On a daily basis, Canyon Creek continues its commitment to "clean operations" with highlights including; advanced wood dust collection system; clean idle truck fleet; reduced carboard packaging inventory and scrap; machining and panel processing optimization technology; energy monitoring and savings programs; and material and chemical recycling.

## California Air Resources Board (CARB)

Canyon Creek Cabinet Company's products are CARB compliant. With the creation of its comprehensive program, California has set one of the toughest standards in the world for placing limits on formaldehyde emissions in products, including building materials. In order to comply with the rules, cabinet manufacturers have to prove that their products-both foreign and domestic-are made from compliant materials through "chain of custody" third-party documentation from their suppliers. Canyon Creek has gone beyond the CARB requirement by ensuring that all products-not just those shipped to California-are CARB compliant.
